

Talking about Environmental Issues and Concerns

Read the information about different environmental issues and concerns. Then, answer the questions below.

Climate Change

Climate change is a significant environmental challenge. It's causing rising temperatures, extreme weather conditions, and the melting of polar ice. To combat it, reduce your carbon footprint by using public transportation, conserving energy, and supporting eco-friendly practices.

Deforestation

Deforestation is the destruction of forests, which leads to habitat loss and contributes to climate change. You can help by planting trees, supporting organizations that protect forests, and reducing your paper consumption.

Pollution

Air and water pollution harm our health and ecosystems. To reduce pollution, use reusable items, properly dispose of rubbish, and participate in local clean-up efforts.

Plastic Pollution

Plastic pollution in oceans is a severe issue. Avoid single-use plastics, recycle, and participate in beach clean-ups.

Endangered Species

Species are disappearing very fast. Learn about local wildlife, support conservation efforts, and create wildlife-friendly spaces in your community.

Overconsumption

Overconsumption reduces resources. Buy only what you need, reducing food waste, and reusing items.

Water Shortage

Access to clean water is a global challenge. Conserve water at home, support organizations providing clean water, and learn about water-saving technologies.

Renewable Energy

Transition to renewable energy sources like solar and wind power to reduce our reliance on fossil fuels.

Sustainable Agriculture

Support local and sustainable agriculture practices, reduce meat consumption, and choose eco-friendly products.

Education and Support

Stay informed about environmental issues and share your knowledge with others. Support policies that protect the environment.

Worksheet Questions

Question 1

What is one way we can combat climate change?

- a) Reduce carbon footprint
- b) Use more fossil fuels
- c) Waste energy

Question 2

What is the main cause of deforestation?

- a) Planting more trees
- b) Protecting forests
- c) Destruction of forests

Question 3

How can we reduce pollution?

- a) Use reusable items
- b) Properly dispose of rubbish

- c) Participate in local clean-up efforts
- d) All of the above

Question 4

What can we do to reduce plastic pollution?

- a) Avoid single-use plastics
- b) Recycle
- c) Participate in beach clean-ups
- d) All of the above

Question 5

Why is it important to support conservation efforts and create wildlife-friendly spaces?

- a) To protect endangered species
- b) To encourage deforestation
- c) To increase pollution

Question 6

How can overconsumption affect resources?

- a) It increases resources
- b) It reduces resources
- c) It has no effect on resources

Question 7

What can we do to conserve water?

- a) Conserve water at home

- b) Support organizations providing clean water
- c) Learn about water-saving technologies
- d) All of the above

Question 8

What is one renewable energy source we can transition to?

- a) Solar power
- b) Fossil fuels
- c) Nuclear power

Question 9

How can we support sustainable agriculture?

- a) Support local and sustainable agriculture practices
- b) Reduce meat consumption
- c) Choose eco-friendly products
- d) All of the above

Question 10

What can we do to support the environment with education and support?

- a) Stay informed about environmental issues
- b) Share knowledge with others
- c) Support policies that protect the environment
- d) All of the above
