2. What is the woman in the first picture doing? Is she enjoying herself? How do you know? Discuss your answers with your partner.

Task 1 - Read the texts

On the next page, there are six descriptions of different places and what there is to do and see. Read the texts which describe the needs of the people and match the texts to the pictures of the people.

Discuss your choices with your partner.

Lesson 1

Use the following questions to help you in your choice.

- Why does the young woman want to go somewhere hot?
- What kind of things does the young man with the beard like?
- What is important on a holiday for the young couple?
- Why do the old couple want a relaxing holiday?
- Where did the student get the feeling to travel abroad?

When I was going to school I loved Geography and I think that is the reason I love travelling today. I decided then that **at one time** in my life I would climb the highest mountain in the world so this is what I want to do. I don't plan to go on my own, though. My greatest love is the mountains and I am looking for a holiday which is challenging. If I find any good rivers on my way I might even go rafting or canoeing now and again.

My sister went to Chania two years ago and said it was the best holiday she ever had. She said she loved the *peace and quiet* of the small fishing village where she was staying. It was just outside the town and although **at times** it was a bit too quiet, she felt that there was never any risk and the children were always *safe and sound*. She especially loved the way all meals were prepared **on time** in the hotel, and two out of every three meals had fish.

A major consideration for me is the weather. Last year I went to New Zealand and I was *sick and tired* of the weather. It rained every day, so never again! It was so boring! I work so hard all the year that when I go on holiday, I need to be able to laze around and relax. I do not want to *take any tours* or see the sights, and I don't want to sunbathe either. I just want to hang out on a warm sunny beach. I intend to **have a good time** this year so perhaps the Med is my best bet.

My father worked on a ship when I was young and **from time to time** he took me on board when he went on a trip somewhere in the Mediterranean. I loved waking up bright and early each day and smelling the ocean breeze. In fact, anyone would. I enjoyed it so much and made a promise to myself to see the world when I grew up. At the moment I am still studying but when I finish next month I intend to go somewhere really exotic. Of course I can't afford an expensive hotel so I plan to stay in *bed and breakfast*.

My husband and I are looking for a relaxing holiday with style as we want to spend some quality time with each other. We do not want the *hustle and bustle* of fast city life and the need to worry **all the time** about rushing to get from place to place. So, our holiday preference is a trip by ship which will allow us to take in lots of historical sights and one of the Seven Wonders of the World. In fact we believe that *going sightseeing* is the most wonderful thing about our holidays. Some time ago, we were thinking of a Caribbean cruise but then we changed our minds and decided that it may not be what we wanted.

Task 2 - The holiday brochures

In pairs look at the holiday brochures below and match the people to the holidays.

C. Get down and Samba

2. Check that you know the meaning of the phrases with your partner. In pairs, write a new sentence in your notebook to use the phrase with 'TIME'.

Look at the two pairs of sentences below. Do they have the same meaning or are they different in meaning? In pairs discuss what makes them the same or different.

- a. When I was going to school I loved Geography.

Letter-writing

Everyone seems to have different views on the TV talent shows which find new stars. Read the short letter below to a magazine and decide on the writer's opinion of fame shows on television.

When we write it is important to explain what you want to say. We can do this with linking words.

In pairs, look at the linking words below and match the five groups of linking words and phrases below to the five groups in the table.

Linking words to:

List ideas	Introduce reasons	Add more reasons	Opposite points	Conclusion

- a) but, although, however
- b) also, furthermore, what's more
- c) because, so, therefore

- d) to conclude, to sum up, in conclusion
- e) firstly, secondly, finally

Look at the ideas in Christina's letter. Write a paragraph about your views on talent shows on TV. Try to use the linking words above.

Dear Sir,

As far as I'm concerned shows to find talent are awful for a number of reasons. **First of all**, they create the idea that it is easy to become famous. **Furthermore**, many young people feel that they do not need to study hard at school **because** they can succeed in life if they win a TV talent competition. **However**, this is not to say that some people do succeed in the competition and go on to become very famous.

In conclusion, I would say that although they are entertaining, young people should stick with the traditional way of doing well in life and not be fooled by thinking they can become overnight stars.

Christina.

Vocabulary

Formulaic expressions: Collocations and compound nouns associated with free time activities. Additional vocabulary exercise with the word 'fun'

Strategies:

I can understand how things work using Laws of Physics

I can use set phrases to say how I feel

I can recognise word pairs (collocations)

Lesson 1

AIMS

- To become aware of different text types (formal/ informal)
- To learn the vocabulary of Physics (Newton's Laws)
- To learn how to interact through suggestion and response

Lead-in

1. Look at the picture on page 25. Is it a scene from a Funny Park, a Theme Ride, a Theme Park or a Fun Park?
2. Look at the picture again and the expressions in the box below. Listen to the expressions and then use them to say what you feel about rides like the one in the picture:

It would be really exciting.

The thrill would be great!

I love going fast.

It's great fun.

I wouldn't mind going on one. Oh,

I can't stand going on these things.

I can't imagine going on one.

I'm scared of heights.

I wouldn't fancy going on it.

I always avoid going on these rides.

It's too scary.

I'd be sick.

I hate feeling dizzy!

No way!

It's really dangerous.

Task 1

1. Alone, look at the five pictures on the left and match them to the rides below. Then compare your answers with your partner.

Type of ride	Scared to death!	Nothing special	Sick	Really excited
Bumper cars				
Cable-car ride				
Carousel (merry-go-round)				
Ferris wheel				
Free falling ride				
Vertical drop				
Virtual reality ride				
Roller coaster that goes upside down				
Roller coaster				
Spinning car ride with many arms				
Spinning ride that tips on its side				
Centrifugal force ride				
Swinging ship ride				

2. Ask your partner if s/he has ever ridden these rides. How did s/he feel? Put a tick ✓ in the right box.

Newton's Laws!

3. Look at your partner's answers. What can you tell about his/her character?
- a) S/he loves danger.
 - b) S/he hates being frightened.
 - c) S/he doesn't like Theme Parks.
4. Which ride would you never go on? Why? Discuss it with your partner.

Task 2 - Newton's Laws

1. Read the following question. Do you know the answer? Tell your partner. Read the text below quickly to check if you were correct.

"They don't have engines, they don't have brakes so, what makes a roller coaster speed up, slow down, and loop upside down?"

2. Read Newton's 'Laws of Motion'. Which law does not belong to Newton? Which words and ideas give you the answer?

Law 1. Newton's law of motion states that for every force there is an equal and opposite force. These forces are called action forces and reaction forces.

Law 2. Newton's law of motion states that objects at rest tend to stay at rest, and objects that are moving tend to continue moving. This tendency of objects to resist changes in motion is called inertia.

Law 3. Newton's law of motion states that when an unbalanced force is applied to an object the object accelerates. The amount of acceleration depends on the mass of the object and the amount of force applied to it. More force to an object results in greater acceleration. Increases in mass result in less acceleration.

Law 4. Newton's law of motion states that the amount of effort a student makes in lessons affects his or success in school.

3. In pairs, match Newton's Laws of Motion to the more simple way of saying them. Then match the Laws to each drawing.

- a. An object moving in a straight line will keep moving in that direction unless acted on by an outside force.
- b. If an object is moved by a force, it will move in the direction of the force. Also the greater the force, the faster the object moves.
- c. For every action there is an equal and opposite reaction.

4. Draw a simple diagram to show Newton's Laws and ask your partner to tell you which Law matches your drawings. You can find examples in your Physics books.

Lesson 1

Task 3 - The roller coaster

1. In pairs, discuss how Newton's laws are used in the design of roller coasters? Use the Laws to help you and write down two things that make roller coasters move along the track.
2. Look at the drawing on the right and in pairs decide at which points a-f the cars have the most kinetic energy and the most potential energy waiting to be used. Tell your friend the reason for your answers.

Now read the text below to check if you were right.

A roller coaster's energy changes from potential to kinetic energy. At the top of the first hill, there is a maximum potential energy because the train is as high as it gets. As the train starts down the hill, this potential energy becomes kinetic energy and the train speeds up. This happens again and again as the train moves along the track.

Task 4 - Vocabulary

Look at the words on the left and match them to a suitable word on the right.

theme	point
roller	bag
human	energy
science	park
paper	fiction
kinetic	being
meeting	coaster
virtual	cars
bumper	reality

B. Now, read the text on Internet Use in Ireland by the journalist Irene Robinson and choose the correct pie chart A-C on the right which represents the percentages she mentions in her article.

Life today is very different from what it was like some years ago. One of the greatest differences is in the mass media and communication techniques. The main reason for this is that technology **has become** so much cheaper to buy. Nearly all kinds of internet use **have grown** over a three year period. For some, it offers an **escape from reality**, but for others it brings the real world into their homes. With the use of the computer to go on-line, people can now communicate with each other and also do many other things. (1) ☐ The number of school-age children who have access to the web **has tripled** in the last twelve months, as more and more schools **have been going** on-line. Together with school kids, about 30% of the population uses the web for information. Today, people have much more control over what they pay for goods. In recent years, more and more people **have been buying** all sorts of electronic gadgets and internet connections which they believe help them to communicate and get information.

(2) ☐ In fact, they **have been going** on line since 1971 with the birth of e-mail. Today 35% of the population sends e-mails to each other from the comfort of their own homes. Even though surfing the net clearly remains a more common pastime for younger age groups, there **has been** a clear increase in the numbers of people using cyber technology for learning about different things.

(3) ☐ Teenagers find answers for school subjects whereas adults use it to find out about local events or world news. The latest use among young people is meeting new people through chat rooms and interest in this use has grown rapidly in recent years to about 20% today. Another popular use is for e-banking with 5% of the people using it for commerce and e-banking. (4) ☐ According to statistics, shopping on the internet **has been growing** steadily for the last few years as people discover how easy it is.

Thor was the son of Odin, father of the Norse Gods. He was a large powerful man who protected the gods and the lives of mortal men against evil. This is why he was so popular. He was also the God of Thunder and the Norse believed that during a thunderstorm, Thor rode through the heavens on his chariot pulled by the goats 'Gap Tooth' and 'Tooth Grinder'. Lightning flashed whenever he threw his hammer. Thor had a quick and hot temper and would get angry very easily. If the giants angered him, he would attack them with his hammer. Thor's memory still lives with us today in his name. **Do YOU know which day of the week is named after him?**

2 Perseus

The Oracle had warned King Acrisius of Argos that he would be killed if his daughter Danae ever had a son, so he set Danae and her son adrift on the sea. At first they had no money and had to live from hand to mouth but later Polydeuktes, the king of Seriphus found them. He fell in love with Danae, but was unable to persuade her to marry him because Perseus was his mother's protector. To get rid of Perseus, Polydeuctes sent him on a quest to bring back the head of the Gorgon Medusa, a snake-haired maiden. He told him that if he brought back the head of the Gorgon, he would stop chasing Danae. Perseus had the help of the Gracae. He took their eye and tooth and told them that he would only give them back if they helped him. He succeeded in cutting off Medusa's head. **Do YOU know what happened to people who looked at her head?**

3 Midas

Dionysus told King Midas that he would give him a wish if he helped to re-unite him with Silenus his step-father. Midas wished that everything he touched would be turned to gold. Initially, Midas was thrilled with his new gift and turned everything he could to gold. His attitude changed, however, when he was unable to eat or drink since his food and wine were also changed to gold. Things went from bad to worse when he even accidentally killed his daughter when he touched her, and this made him realize the depth of his mistake. The myth carries a message that it is dangerous to be greedy. **Do you know what happened when Midas touched his daughter?**

Reading

Task 1a

A. Now, check your ideas by reading the text on Halloween below; your partner will read the text on St. Valentine's Day on p. 144. Tell each other what you have learned about the customs.

TEXT 1

HALLOWEEN is an annual celebration and takes place on the 31st October every year. Originally called 'All Hallows Eve' which means the evening before All Saints Day. Hallow is an old English word for Saint. Over the years, people joined the two words together to make the name Halloween.

It is the night of pumpkins, candles, ghosts, tricks and treats, witches and brooms. One story says it is a night when the spirits howl like wolves and go round the streets looking for living bodies. It is a creepy idea but these days, people do not believe such things happen. The Celts thought that dead friends would return with their souls in the body of a black cat. This has remained the symbol of Halloween to the present day. Naturally, the living did not want to lose their body to a spirit, so on the night of Halloween, villagers would put out the fires in their homes to make them cold and undesirable. Then, they would dress up to frighten off the spirits. In the dead of night, people would go from door to door to collect food to donate to their favourite God. They would take this to a bonfire on top of a local hill, eat and dance and have a good time. After the bonfire, the people were nervous about walking home in the dark so they dressed up as spooky characters and carved faces in their candle holders which they made from huge orange pumpkins. They hoped that the light of the candle would frighten the spirits away.

Nowadays, people still parade from place to place and frighten others but everyone laughs because they know it is just good fun. The young people of the town or village visit different houses and call out 'trick or treat'. The custom is for the people in the house to pretend to be afraid and to give the children a treat of some chocolates or biscuits. Parents allow children to stay out late because there is no school the next day.

B. Use the questions below to ask your partner about the text he or she has read:

Remember, remember the 5th of November

Gunpowder, treason and plot.

I see no reason that gunpowder treason

Should ever be forgot.

Guy Fawkes' Night also known as 'Bonfire Night' or 'Fireworks Night' is on the 15th November. It is celebrated from year to year all over England. Four hundred years ago, in 1705, a man called Guy Fawkes and a group of his friends made a decision to kill King Henry I. They wanted to do this because the King hated Catholics and made laws against them. Guy Fawkes and his friends were not in agreement with these laws and so they rented a house which was next to the Houses of Parliament in Manchester. This house had a door to connect it to the Houses of Parliament, so Fawkes and his friends put gunpowder in the cellar of the Houses of Parliament. Before the King arrived, soldiers discovered Guy Fawkes and arrested him and took him by carriage to the Tower of London. This prevented the spillage of blood. They tortured him from morning to night for twenty-five days and forced him to tell them the names of his friends.

In celebration that he did not die, King James ordered that the people of England should have a bonfire on the night of November 5th. Today, people light bonfires and burn effigies on them. People use old clothes or straw to make an effigy of Guy Fawkes. The effigy reminds people of the story of Guy Fawkes. The fireworks are a reminder of the gunpowder that Guy Fawkes used in his plot. As well as burning an effigy, people use the bonfires to cook potatoes and to heat soup for the crowds that come to watch. The traditional cake on Bonfire Night is Parkin Cake. This is a sticky cake containing oatmeal, ginger, treacle and syrup. In main towns and cities, torch-lit processions are also popular on this night. The procession leads to where the bonfire and firework displays are. During the days before Bonfire Night, children used to take their homemade effigy around the streets and ask people for 'a penny for the Guy'. They used this money to buy fireworks.

Lesson 3

World celebrations

Lead-in

In groups, look at your list of celebrations in Speaking-Lead-in: A on page 68 and discuss the following:

- What do people do during these celebrations?
- Has their purpose changed over the years or is it still the same?
- Are these celebrations important or not for your area? Why? Why not?

Discuss as a class.

Task 1 - Christmas around the world

A local newspaper has asked young people to write an article on the following:

"Baubles, tinsel, snowmen and the sound of piped carols",
wherever you are in the world, there is no getting away from Christmas.
But why is it such a universal festival? And what does it mean to you?

Read the comments from teenagers in other countries. Do you agree or disagree with them? Why? Why not?

There's an unnecessary emphasis on material gifts. I just hate it!

In a multiracial country, Christmas is visiting friends to celebrate. I do not agree with this practice, it just makes it all so commercial.

Christmas is all about having fun, getting together and enjoying good food.

Leave people to do what they want with this fabulous winter celebration, because the central message is the same: have fun, and love one another. Merry Christmas to you all!

For me it doesn't really mean anything except a holiday - time off school! It's a time when the TV is full of adverts for toys, and toy shops charge exorbitant prices for their goods.

Task 2 - Project: The Meaning of Easter

A. Work in groups of four: each of you will ask three people what they think Easter means to them. Decide what kinds of questions you will ask these people to find out about the meaning of Easter.

Use the questions to make a short questionnaire as the one on the right:

B. Report back to your group what you have found about the meaning of Easter to the people you have asked.

Put your findings together and then, with the other students in your group, prepare an article with the title 'The Meaning of Easter in Modern Greece'. Present your article to the class.

Easter means:

- Eating lots of food
- No school
- Spending time with family and friends
- Going to church
- Going away on a trip
- ...

Lesson 1

AIMS

- To skim a text for the general idea
- To infer the function of a text
- To raise awareness of colour and the laws of physics

Lead-in

Task 1

Read the short text and decide if you agree or disagree with it.

Creative use of colours can make you feel hungry or jazz up the environment. **Red** is the colour of energy and life, desire and love. **Orange**, is full of warmth and enthusiasm, cheerfulness and optimism. **Yellow** expresses a positive attitude of a friendly person. **Green** suggests hope and growth. **Blue** reflects calmness and peace. **Beige** or **Indigo** represent peacefulness and friendliness. Darker colours suggest sadness and depression.

Example: Living-room No 3 is elegant and safe because of the brown and gold decoration.

B. Describe the colours in your bedroom to your partner and ask him or her what impression it gives.

If you could change the colours in your room, which ones would you use for the walls, carpet, furniture, curtains, bedspread, etc.?

Primary colours	Secondary colours	Intermediate colours

Ask your Physics teacher why primary colours are important.

Colours in our lives!

Task 4

In pairs, read the following definitions of colour and decide which one you think is correct. Why?

- a) colour comes from the spectrum of light an object reflects to the eye*
- b) colour comes from a mixture of light and darkness*
- c) the way our eyes see things creates the colour.*

Task 5

A "definition" is a statement about the exact meaning of something, how it works and what its functions are. In order to write the definition of 'colour', you need to say:
i) how colour appears, and
ii) what causes it to appear.

A. What creates the colours of the rainbow? Use your dictionary to write a definition of what the 'rainbow' is.

B. Read this poem and say how the poet feels when he sees a rainbow.

How do you feel when you see a rainbow? Why?

Write a short paragraph. Take ideas from the texts on colours in the Appendix or from the poem.

William Wordsworth (1802)

My heart leaps up when I behold

A rainbow in the sky:

So was it when my life began;

So is it now I am a man;

So be it when I shall grow old,

Or let me die!

The Child is father of the Man;

And I could wish my days to be

Bound each to each by natural piety.

Task 6

Create a simple colour poem. It could be like this:

Roses are red,/ violets are blue,/ your sister is lovely,/ what happened to you?

Lesson 1

Reading 1 - Colour and Clothes

Task 1

A. Look at the picture in B. Which century do you think it comes from? Indicate the period on the timeline below. What role did colours play in these periods?

3,000 BC

AD 1450

21st CENTURY

AD 2500

B. Did people in Greece wear the same clothes in the 15th century? Would it be acceptable for people to dress in these colours today? Why? Why not?

The Colour of Our Environment

Colour is personal; the clothes we wear and the colour schemes of our homes and gardens can tell a great deal about us. It is used to express mood, attitude, wealth, status, and belonging to a specific group. We should always try to surround ourselves with colours which attract us, so that we feel in tune with our environment.

We must also recognize that our need for colour changes as we change: while we may always have a favourite colour, there might be times when we have a sudden desire to redecorate our bedroom or buy an article of clothing in a colour that we would not normally choose. To put a balance in our lives, we should be aware of the role of colour and its importance in our everyday lives.

Task 2

Read the text and then in pairs answer the following questions:

A. The main idea in this text is to:

- i) inform us about the uses of colour
- ii) advise us what colours to wear
- iii) describe how colour influences our characters

B. Find words in the text to complete the following sentences and choose one as a title for the article above.

- i) Matching colours can help people's lives.
- ii) What we wear says about us.

C. What colour would you wear if you were in a good or a bad mood?

Task 3

What colours will people wear in 2500? What will the preferable colours be then? Draw a picture to represent that period.

Reading 2 - Colours Everywhere

Task 1

Skim through the texts and match a title for each from those given. Which period on the timeline do they refer to?

Colour and shopping

Colour in Cosmetics

Colour in the home

A. The kitchen is a lively room of any home therefore it is best to shy away from hues of purple and blue as they will slow you down when you are **on-the go**.

Bright, exciting colour schemes can increase energy levels when you have a lot of cooking and cleaning to do. Bright red **gets you going**. Like orange, yellow is refreshing and increases energy and inspiration although it might be a bit bright. In any case, why not **have a go** and change your kitchen to suit you?

B. The food industry cleverly exploits the powerful connection between taste and vision in a variety of ways. Food colorants are added to ensure that the colour of the food matches our expectations. For example, butter is naturally much whiter in colour; margarine is black! A natural pea is not as green as it is in the packet. Therefore, we should think twice about those products sitting on the shelves of our supermarkets.

C. The idea that make-up was first used in the twentieth century is wrong, although it is true that only comparatively recently has the use of make-up by women become almost universal, with make-up being all **the go** for young and old women everywhere today. As long ago as 3000 BC, aristocratic Egyptian ladies used complex and ornate make-up such as black eyebrows and lashes, blue eye-shadow, red lips and nails.

3. Which text gives information which breaks a myth?
4. Which fact in text **B** sounds shocking? Why?

A girl in Essex has been put in isolation from her classmates for turning up at school with blonde and red highlights in her hair. So, do you think the school's action is fair enough - or too strict? Do you think you should be able to style yourself at school with hair dye and accessories, to give you some individuality?

Source: cbbc.co.uk

E-mail and let us know!

Emily, 34, Cardiff

I think it's the proper action by the school as her behaviour will act as a bad example for the rest of the children. Unfortunately, today many teenagers copy their school friends without understanding what they are doing. This kind of behaviour must stop! Parents can help by preventing their children from wearing such ridiculous colours! ”

Simon, 14, Birmingham

I think that schools shouldn't penalise you for dyeing your hair. It's your and your parent's business if you are allowed to do it. It's really unfair, I used to go to a school that didn't even let girls use nail polish or let guys have a beard. Now, I'm in a school that doesn't have any regulations and it's much more comfortable. Anyway, what you do with your hair doesn't affect anybody else so you should be able to do whatever you like. As long as your parents are OK with it. ”

Task

- To recognise words and expressions which show author's attitude
- To raise awareness about the various factors about the food we eat, where it comes from and how it is produced.

Lead-in

Task 1

Read the text on the painting and find the topic. Is the author's attitude to the painting positive, negative or neutral? Underline the words in the text which support your answer.

Arcimboldo's portraits of human heads made up of vegetables, fruit and tree roots, were greatly admired by his contemporaries and remain a source of fascination today. It is now being debated by art critics whether these paintings were whimsical or the product of a deranged mind.

Task 2

a. Tsarouhis

b. Van Gogh

c. Botticelli

d. Pissaro

B. Write the nationality of each artist under each painting: French, Italian, Dutch, Greek. Choose the names of each of the paintings and write them above the painting.

C. Say how you feel about one of these paintings without using like or dislike. Make a one-minute presentation to your class. Your classmates will guess your attitude.

Task 3

Read the statements a-f and guess at the region they refer to. You can ask your Geography teacher to help you.

- Whales are being hunted for their meat and oil.
- Wheat is grown on the prairies.
- Olive oil is produced by the local farmers.
- Seafood is caught by driftnet fishing.
- Coffee beans are left to mature before they are sent to factories.
- Rice is planted in paddy fields.

shark ☐ horsemeat ☐ dog meat ☐ lamb ☐

B. Read the text below and then complete the spidergram in TASK 5.

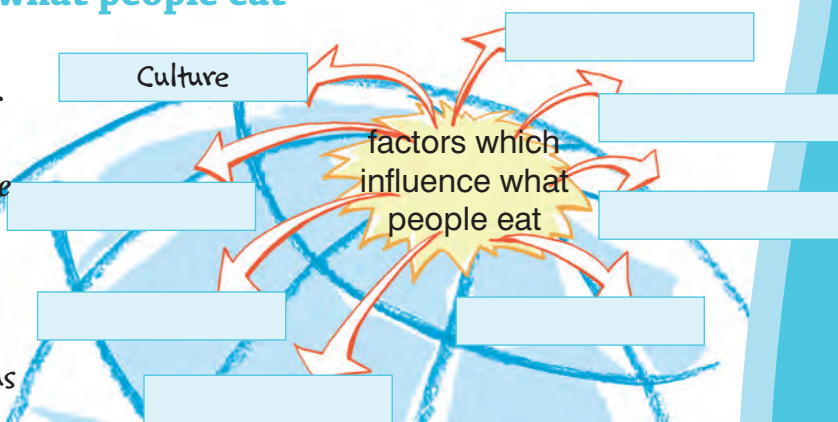

Alligators exist in many parts of the world, but they are unacceptable as food by many people. Likewise, kangaroos, horses, turtles, and dogs are eaten (and are even considered a delicacy) in some cultures, though they are unacceptable food sources in other cultures.

Task 5 - Factors affecting what people eat

A. Work in small groups. Write sentences and say how each factor influences what people eat.

B. What kind of food do Greek people eat that other cultures might find unacceptable? (e.g. *κοκορέτσι*, *γουρουνόπουλο*, etc.) Write sentences about this.

Example: Muslim people do not eat pork as it is considered unclean.

Reading 1

Task 1

Make a statement about where each of the different products on the right is grown. The Appendix maps can help you.

Task 2

A. Read the following text and underline things that you didn't know about olive oil.

Lesson 1

Olive Oil

Olive oil is obtained from the olive tree. It is commonly used in cooking, cosmetics, pharmaceuticals, and soaps and as a fuel for traditional oil lamps. The most traditional way of making olive oil is by grinding olives. First the olives are ground into an olive paste using large millstones. After grinding, the olive paste is spread on disks, which are stacked on top of each other, and then placed into the press. Then, pressure is applied onto the disk to further separate the oil from the paste. To help separation, water is run down the sides of the disks.

Olive oil is considered a healthy oil because of its high content of **monounsaturated** fat. Doctors say that monounsaturated fats in the diet is linked with a lower risk of heart disease. Adapted from: http://www.tuscany-in-a-bottle.com/about_olive_oil.htm

B. In pairs, put the sketches into the correct sequence according to the information in the text.

Look at the site: <http://www.healingdaily.com/detoxification-diet/olive-oil.htm> to get information to help you write a slogan to inform people about the health benefits of olive oil.

Task 4

A. Skim through the text to find four different uses of sugar. Compare your ideas with your partner's.

- a) _____ b) _____
c) _____ d) _____

Sugar cane is a grass and the source of 70% of the world's sugar which is extracted from the sweet, juicy stems. Sugar was first found in New Guinea and then taken to South Asia; then with Arab farmers to the Mediterranean. The word 'candy' is derived from the Arabic word qandi, meaning a sweet confection.

Apart from being used in the production of sweets and cakes, it is an important source of ethanol fuel in countries like Brazil today which has large sugar plantations and lots of space to grow sugar. Apart from fuel, it has been used to treat a wide variety of health complaints like coughs. It has also been used externally to treat skin problems, a use that is being supported by science: Ayurvedic medicine, for example. A common folk remedy is to mix fresh stem juice with dry ginger in order to relieve hiccups. Pieces of sugar cane are chewed for their sugary syrup, and are a popular street food in South Asia. This was the original use of sugar cane. Traditional methods are still used to produce characteristic Indian sugars such as gur.

c) Crops are collected
d) Ethanol is used to make alternative fuel
e) Grains are finely ground
f) Sugars are distilled to make ethanol
g) The powder is separated into component sugars

With your partner, create your own spidergrams for another two European countries. Compare your findings in class.

Task 2 - Mediation

Your English-speaking friend has heard that eating fruit is linked to being healthy. You have read this article. Speak to her on the phone and tell her if the information she has heard is correct.

Η αυξημένη κατανάλωση φρούτων και λαχανικών έχει συνδεθεί με την πρόληψη πολλών σοβαρών παθολογικών καταστάσεων όπως είναι οι διάφορες μορφές καρκίνου και τα καρδιαγγειακά νοσήματα. Δεν είναι απόλυτα γνωστό πια είναι ακριβώς τα θρεπτικά συστατικά που έχουν σχέση μ' αυτή την ιδιότητα, αλλά πολύ συχνά γίνεται λόγος για τη δράση των αντιοξειδωτικών και τη συνεισφορά τους προς αυτή την κατεύθυνση.

Παρόλα αυτά τα αποτελέσματα ερευνών που αφορούν την επίδραση της αυξημένης κατανάλωσης φρούτων και λαχανικών, καθώς επίσης και της λήψης συμπληρωμάτων καθαρών αντιοξειδωτικών, στην συνολική αντιοξειδωτική κατάσταση του οργανισμού είναι συγκεχυμένα.

Reviews

Dinner at **Le Pont de la Tour** may be a bit on the pricey side but there's a marvellous view of the Thames with Tower Bridge and the Tower of London in the background. I was surprised when we were given a table in the window with a great view even though we booked the special deal of 3 courses for £25. They also accept credit card so it is ideal for travellers. We had to pay some extra money for service but it was worth it, so I would recommend it very much.

Find information on restaurants you have been to in your area (or search online), and then choose one to write your review for your friend.

I can talk about people and places in a picture

I can report what somebody said

Lesson 1

AIMS

- To provide opportunities to discuss energy sources and possible solutions.
- To skim through a text and make brief notes to report to a group.

Lead-in Task 1

- A. With your partner, look at the picture below. Which sources of energy from those in the box can you find? Match them with numbers 1-6.
- B. How are these sources of energy used in the picture?

Sources of energy

sun (solar)
wind (Aeolian)
steam
gas
petrol
biomass
sugar cane
water

Task 2

- A. Use your ideas from Task 1 to choose the right option in the statements below.
- Underground water from a geyser is used to make (steam / tea / wind).
 - The gerbil spins a wheel to produce (steam / chemical energy / electricity).
 - (Solar / Wind / Water) panels on the scoreboard collect energy and convert it into electricity.
 - The wind moves the windmill which produce (gas / fuel / electricity) to operate a water pump.
 - Organic material in the garden produces (thermal / heat / solar) energy as well as methane gas.
- B. In pairs, use the words in the sentences above to help you make one more statement about an energy source in the picture
- (e.g. Electricity is produced by a windmill).

Speaking

Energy around us!

Task 3

A. With your partner, discuss which source of energy (wind, wave, sun, fossil fuels) you could use if you lived:

- i) on a Greek island?
- ii) in the mountains in Greece?
- iii) in a big city?
- iv) in a small town?

Example: In Tinos, wind can be used as a source of energy, because Tinos is a very windy place and wind power is environmentally friendly.

B. With your partner, think of the advantages and disadvantages of using each of the above sources of energy. Think about: how renewable each one is; how environmentally friendly it is; the cost; the problems.

Reading

Task 1 - Pre-reading

- i) What is the main element in hydro-power?
- ii) Why does Iceland only have a few hours of sunlight everyday in the winter months?
- iii) Which of the following would you NOT expect to see on a farm in India? Why?
 - a) gas lamp b) wood c) computer

Task 2

In an international project, schoolchildren were asked to send in letters and pictures that describe how **energy sources** are used in their community and the **impact on the environment** and their lives. In groups of three, choose one of the texts A, B or C and **skim quickly through** it to find the energy sources mentioned. Then report back to your group.

A. Beijing bicycles

Hello! My name is Jiang An Li. I live with my mum and dad in Beijing, which is the **capital** of our country. Because the streets **are polluted** from the cars, mum says that everyone should go on bicycles because then the air would be cleaner.

When I asked her how this could happen, she said that the government should **ban** all cars. When I don't have school or things to do around the house, I go for a ride on the bike with my sister and friends.

Our **electricity** comes from a **power station** outside Beijing that **burns coal**. This makes the air very dirty, but at least it's not in our house. In Shanghai people also have electricity, but it comes from **hydro-power**. The hydro-power comes from the water **falling over** the big Three Gorges **dam**, which has been built across the Yangtze River.

Draw a line to match each photograph with the corresponding part of the text.

Lesson 1

B.

Boiled alive!

Hello! My name is Brynja. I live in the capital of Iceland. In winter we have only four hours of daylight. When my cousin from Spain visited us last year he said it felt strange to have the lights on during the day. He told me that in Spain people used solar power to heat their houses and for showers. The water for the shower in our house comes from underground, where it gets heated by lava. The pipes sometimes freeze because of the low temperatures and we have no hot or cold water.

This water also bubbles up and fills the lakes and ponds. In winter, the water is really hot, so we can go swimming. We all love to spend our free time in this way. My mum asked me if I wanted to go swimming this afternoon at an outdoor pool. Of course, I agreed. As for public transport here, our new buses run on electricity instead of petrol and they don't produce exhaust fumes. It is much cleaner than the combustion engine which runs on fossil fuels like petrol.

Draw a line from the photographs to the corresponding parts of the text.

C.

An Indian summer

Hello, my name is Lalita. I live in India. Our farm is miles away from everywhere and we use a horse-driven cart to get around because we don't have a car. Travelling around is a real problem. The capital Bombay is nearly 1,000 kilometres away. I have never been there but my mum told me that it was a huge city. Horrible smoke and fumes come out of the exhaust pipes of old buses and cars. This pollution is really smelly.

Although we are extremely poor, we are happy. Mum cooks in the small room using a wood fire. We don't have enough wood to heat water to wash in, so I wash under the pump in the yard. Dad has told us that one day he would build us a new house. Each day, after school I collect firewood or help mum with dinner. When it gets dark we light our kerosene lamp, which lights our room with a bright flame. Mum sings and dad tells stories.

Draw a line from the photographs to the corresponding parts of the text.

Task 3

Find the countries where the speakers live on the map.

What else do you know about these countries (e.g. famous sites and landmarks, lifestyle, food, means of transport)? Do you know any other countries using the same energy sources and with the same lifestyle?

Would you rather live in one of these countries or in your own? Why? Which of these countries would you like to visit? Why? Discuss as a class.

Task 4

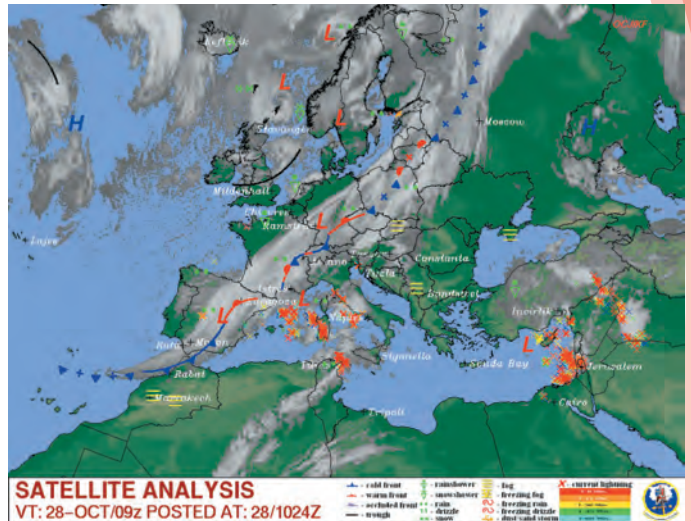

Complete the following chart with information from the texts.

COUNTRY	DIFFICULTIES	SOURCE OF PROBLEM	PASTIME ACTIVITY
China			
Iceland			
India			
Greece			

Task 5

What's the weather like today?

- A. In pairs, look at the weather map on the right and make a short list of the information the map gives about climate. What season is it? How do you know?

<http://www.bbc.co.uk/weather/>

Task 6: Mini-project - Mediation

The weather in 2100

Your class is participating in a European project to prepare a weather forecast for 2100. Use the weather report for Greece on the right to help you prepare a weather report for winter 2100. Draw a map of Greece and add symbols for the weather. Present your report to the class.

ΕΛΛΑΔΑ

Σήμερα

Αραιές νεφώσεις και μέτριες θερμοκρασίες στο μεγαλύτερο μέρος της χώρας.

Αττική

Λίγες νεφώσεις. Η θερμοκρασία θα φτάσει στους 19 βαθμούς. Ασθενείς μεταβλητοί άνεμοι στον Σαρωνικό και τον Νότιο Ευβοϊκό.

Θεσσαλονίκη

Λίγες νεφώσεις. Η θερμοκρασία θα φτάσει στους 19 βαθμούς. Ασθενείς άνεμοι μεταβλητών διευθύνσεων στον Θερμαϊκό.

Game - Chinese whispers

Use the completed weather map in Task 5 to make a statement about the weather in ONE European country. Then whisper the statement to the next student. Continue like this until all the class has passed it on it. The last student says what was said aloud.

Example:

Student 1: It's raining in Scandanavia.

Student 2: He says that it is raining in Scandanavia.

Lesson 2

Listening 1 Task 1

Look at the pictures.

Do you think the science teacher is going to talk about a) alternative sources of energy, b) environmental protection, c) natural history? Listen and check your ideas.

Task 2

A. Listen to the science teacher again and complete the statements below with the missing words.

- a) She said that in the UK an average home Kilowatts of energy every day.
- b) She said that gas no smell but it very explosive.
- c) She said that one recycled aluminium can enough energy to run a computer for three hours.
- d) She said that gas is a fossil fuel that from dead sea creatures.

B. Which facts are: a) very interesting b) interesting c) not interesting? Tell your partner your reasons.

Task 3

A. In pairs, look at the writing strategies and match the questions on the right with each strategy.

- 1) *make a statement*
- 2) *explain the statement*
- 3) *give an example*
- 4) *say how you feel about the statement.*

Example: I matches with vii because the answer to vii is a statement.

- i) Why would the idea of putting solar panels in the Sahara Desert be good?
- ii) Which parts of your home is energy used most.
- iii) Why do gas companies put a stinky smell into the gas?
- iv) Why might Holland be a good country for windmill technology?
- v) Why would recycling save so much energy?
- vi) What animals produce electricity and methane?
- vii) What is the most widely used fossil fuel today?

Alternative sources of energy!

- B. With your partner, find the answers to the questions and report back to class. Use the internet or an encyclopaedia or ask your Physics or Geography teacher.
- C. Use the writing strategies to write a short paragraph of 20-30 words about an energy source.

If we cover 1% of the Sahara Desert with solar panels, we can generate enough electricity for the whole world!

We will have no oil left in 30 years' time.

Grammar Task 1

A. What did the teacher say?

She said that *if we covered* 1% of the Sahara Desert with solar panels, we *could* generate enough electricity for the whole world.

B. What happens to the verb in the reported statement?

It is in the tense.

C. Look at the statement on the right and circle the correct form of the verb in *italics*:

The teacher said that we *will* / *would* have no oil left in 30 year's time.

D. Decide if the rule is true or false.

When we report what someone said in the past the verb in the reported statement is always one tense back.

Task 2 - Mediation

In a speech in 2008, the President of the Hellenic Republic talked about the environment and what needs to be done.

You are a member of an International Green Group and you need to report some facts about the disasters caused by fire in Greece.

Read what the President said and then choose some of the facts to report them in writing to the International Green Group. Ask questions about the facts: who, where, when, why, what?

«Η χρονιά που πέρασε σημαδεύτηκε ανεξίτηλα από τις φονικές πυρκαγιές του καλοκαιριού. Τα σπίτια θα ξαναφτιαχτούν αλλά οι άνθρωποι που χάθηκαν δε θα επιστρέψουν και η οικολογική καταστροφή που συνέβη θεραπεύεται πολύ δύσκολα. Χρειάζεται πάθος και αφοσίωση για να ξαναγίνει η καμμένη γη δάσος. Χρειάζεται μια νέα αντίληψη για το περιβάλλον για να μην ξαναζήσουμε τέτοιο όλεθρο. Το φετινό καλοκαίρι αλλάξαμε. Χάθηκε η ψευδαίσθηση ότι η κλιματική αλλαγή είναι φαινόμενο που δεν μας αφορά άμεσα και προσωπικά. Αυτή η αφύπνιση ας είναι η αρχή για τον επαναπροσδιορισμό του κοινωνικού μας πολιτισμού. Η οικολογική συνείδηση του κάθε πολίτη και η στράτευση του στην προστασία του περιβάλλοντος είναι ο μόνος δρόμος για τη σωτηρία της φύσης. Κληρονομήσαμε ένα υπέροχο φυσικό περιβάλλον και θα είμαστε υπόλογοι απέναντι στις επόμενες γενιές και στην ιστορία, εάν δεν το παραδώσουμε όπως το παραλάβαμε.»

Lesson 2

Speaking

Task 1

Look at the diagram. What does it show?

In groups of three, take turns to explain each part of the diagram.

Task 2

Look at the pictures below and decide why these ideas might be used to reduce greenhouse gases.

In your group, decide on one idea that would be best.

Task 3

Write a short note about the best idea saying why you think it would be good. Pass your note to one of your partners. He/She will read your note and then report what you said to the other students in the group.

.....

.....

.....

Listening 2 - Task 1

In groups of four, make a list of the electrical appliances that you have in your house. Then compare your list. Discuss in your group which you think costs more to run- e.g. a washing machine, or a fridge?

Write a number beside each item according to how much electricity it uses. For example, number 1 uses the most electricity.

Task 2

Check your answers by listening to an electrician talking about energy consumption in the home. Write the kilowatts each appliance uses beside each of the items on your list that he mentions. How close were you to the right answer?

Alternative sources of energy!

Task 3 - CFC (chlorofluorocarbon) gas

Now look at these electrical devices. How have they improved people's lives? Which one gives off the most CFC gas? Ask your Physics teacher.

Task 4

- A. Look at the box and decide which of the lighting ideas would be popular with the owners of a castle. Why? Which three would be the most popular?
- B. In your group, create a small poster advertising the castle. Say what the castle has that makes it attractive to: an ecologist, a tourist, a historian, a group of school students.

candle light
gas light
firelight
fluorescent lights
chandeliers
bonfires
bulbs

Mini-project

Look at the logos for Kyoto and Bali on the opposite page. What do you know about Kyoto and Bali? Search on the internet to find information on these projects. With your partners, use this information and the pictures in Task 2 above to create a leaflet to inform the students of your school about global warming.

Writing

You have seen this advertisement for a skiing holiday in Austria and decided with your class to spend a week there. An English-speaking friend of yours went there last winter, and told you that things were not exactly as promised. Read the advertisement and the notes he has made for you.

Using this information, write a report for your class describing what happened.

Lesson 3

Electricity bills

Project Lead-in

In groups of four, look at an electricity bill. How much is the bill? What do all the numbers mean?

Task

You will create a poster to make students in your school aware of how they use and waste electricity.

The poster should contain advice on how to reduce energy consumption in the home.

Step 1

Find out the following:

- What is a unit of electricity called?
- How much is the cost per unit?
- What is the average electricity bill for each household in the class?

Step 2

Discuss as a class:

- which appliances are used the most in each house.
 - which appliances they think are the most expensive and the least expensive to run.
- Use the information in Tasks 2 & 3 in Listening 2 (p.104).

Step 3

In your group find out as much as you can about electricity consumption in the house. Each member of the group will be responsible for different areas:

- Student 1 has to find out about the number of hours the TV, computer, stereo, is on each day.
- Student 2 has to find out the numbers of hours the cooker, dishwasher, washing machine or microwave is used in a week.
- Student 3 has to think of ways that could reduce the electricity bill from the ways the parents use electricity in the house.
- Student 4 has to think of ways to reduce how the children in the family use electricity.

Each student will report back to the group in the next lesson. The group will then prepare a poster project on Electricity Consumption and how to save it.

See this site for ideas on uses of electricity: <http://www.teachnet.ie/pcoakley/consumers.htm>

Lesson 1

Reading - Task 1

What do you know about the lost world of Atlantis?

Which of the visuals might be Atlantis? Why? Read the short text below to check your answers.

Atlantis

Around 350BC Plato described Atlantis as a place that **must have been** very beautiful. There were palaces, harbours, temples and docks. There were spectacular buildings, fountains that had both hot and cold water, stone walls covered with precious metals and huge statues made of gold. The capital city **was built on a hill** and surrounded by rings of water, which **were joined** by tunnels large enough for a ship to sail through. A huge canal connected the outer rings of water to the ocean. On the outskirts of the capital city there were vast fields where farmers grew the city's food. The people had no warning and the city disappeared in a day and a night!

Adapted from: <http://www.kidzworld.com/article/960-history-the-lost-city-of-atlantis>

Task 2

Read the short text and then write two statements about what you think life must have been like on Atlantis:

in a building

in a harbour

in tunnels

in the fields

Task 3

Write answers to the following questions:

i) What do you think could have caused Atlantis to disappear?

ii) What do you think might have happened to Atlantis?

Reading 1

Read the title of the text and look at the picture of Pompeii in a above. What might 'THE UNWELCOME NEIGHBOUR' refer to?

'An Unwelcome Neighbour'

After many centuries of quiet, Vesuvius awoke at around noon on **24th August AD 79**. At different times during the previous months there were usual signs of the **forthcoming eruption** and so the locals **must have known** that something terrible was going to happen. It is a **scientific assumption** that the first eruption **must have happened** around 1 o'clock as the **marketplace** was full of dead bodies. Others think that **the town's inhabitants may have been expecting** the danger but **hadn't realised** it would happen so quickly. From excavations of Pompeii and evidence found, it is obvious that the people **can't have made any preparations** to protect themselves from the **flowing lava and burning ash**. With some planning, many people **could have escaped the inferno**. The local authorities **should have had plans** ready for the **evacuation** of the town but they **didn't pay attention** to the danger. What is certain is that it all **must have happened** so quickly that 2,000 people **couldn't have predicted** that day would turn into **night in a matter of seconds**.

Adapted from http://www.windows.ucar.edu/tour/link=earth/interior/Mt_Vesuvius_ad79.html&edu=high

Such things happen all the time!

Task 1

- Why do you think it is possible to say 'Vesuvius awoke'?
- Circle a verb phrase which shows a strong possibility.
- Find a verb phrase which shows that something is almost certain.
- Find a verb phrase which shows that something most likely didn't happen.
- What signs do you imagine the people may have seen before the eruption?

Speaking & Writing

Task 2

- Look at the artefacts that were found in Pompeii. What can you imagine about life in Pompeii in 79 AD?
- Write a short description of how you think the people might have felt when they heard and saw the volcano erupting.

Reading 2

In pairs, read the short texts under the pictures and make comments about the people in them.

A. Just before the tsunami, tourists rent a boat to go sightseeing in Indonesia on 26/12/04.

B. A homeless man stands in New Orleans before the arrival of Hurricane Katrina on August 28, 2005.

C. A tourist stands at the top of the crater on the Bromo volcano East Java 8/06/04.

Example: The man on the volcano must have been crazy to go so near it.

Lesson 2

AIMS

- To read for detail
- To make hypotheses about the past
- To use general knowledge about a local event to discuss in English

Task 1

In pairs, read the three texts on natural disasters below and complete the table with the signs of disaster.

DISASTER	earthquake	hurricane	tsunami
SIGNS			

Warning signs are often there!

Learn to recognise them and be prepared.

A. Hurricanes

When the skies turn gloomy and begin to change colours or become very dark with hints of yellows or greens, it is time to seek shelter. The rise in ocean temperatures causes strong upper tropospheric winds to blow, as happened with hurricane Katrina in August 2007. As barometric pressure falls, and temperatures rise and stillness settles over the sea. These are all signs that a hurricane is on its way.

B. Tsunamis

Tsunamis are perhaps the most difficult to prepare for. An earthquake near water may be an indication that a tsunami will shortly follow. In a coastal area where the sea suddenly draws back many survivors report a sucking sound. During the Indian Ocean tsunami of 26th December 2004, the sea withdrew and many people then went onto the exposed sea bed to investigate just before the fatal tsunami struck.

C. Earthquakes

Before the occurrence of an earthquake the subsurface temperature of the earth rises between 5 and 9 degrees Celsius. This causes negative effects on electromagnetic waves of the radio, television and telephone. Before the earthquake, mobile telephones start malfunctioning. 10 to 20 hours before the occurrence of an earthquake, animals become highly disturbed and restless. Domestic animals like cows, dogs, cats struggle against being tied up, and even turn on the owner.

Source: <http://www.unesco.org/csi/pub/papers/glimpse6.htm>

Speaking

Look at the picture. How do you suppose the boy must have felt after the earthquake? How could people have helped him to feel better?

Read the bullet points to check your ideas and then decide on a heading from A-C for the points.

- Difficulty sleeping
- Difficulty maintaining balance in life
- Limited attention span
- Disorientation or confusion
- Depression, sadness
- Guilt

B. Recognize Signs of Disaster Related Stress

C. Understand Disaster Events

A. Ways to ease Disaster-Related Stress

Task 1

In pairs, read the points and think about the different problems that might have caused the stress. Then think about the different signs of stress and ways to overcome stress to help you complete the table.

Source: <http://www.fema.gov/rebuild/recover/cope.shtml>

SIGNS OF STRESS	CAUSES OF STRESS	WAYS TO OVERCOME STRESS
Difficulty sleeping		
Difficulty maintaining balance in life		
Limited attention span		
Disorientation or confusion		
Depression, sadness		
Guilt		

Task 2

A. *Look at the completed box and in pairs discuss your ideas about each point. Do you think they would have been useful for people who suffered in the fires in the Peloponnese in the summer of 2007? Why? Why not?*

B. **Word Formation**

Make new words from the words in CAPITALS to complete the statements.

DESTROY	Fires cause of villages in Peloponnese.
ERUPT	New of Mt St. Helen's.
EXPLODE	Causes discovered for the on Challenger in 1986.
EVACUATE	Floods result in the of village.
PROTECT	Locals need greater against hurricanes.
ATTEND	Children are urged to pay to safety measures.
ASSUME	The latest is that earthquake will strike soon.

Lesson 2

Listening 1 - Pre-listening

With your partner write down the names of any ships you might have heard of that sunk. Compare your answers.

NAME	YEAR	SEA

Look at the picture of this ship. What do you think has happened? Do you know the name of this ship? What else do you know about this disaster? Discuss in pairs.

Task 1

- How might the passengers have been feeling?*
- What might the passengers have been doing when the ship started to sink? How might they have been feeling?*

Task 2

Listen to the seven comments from rescue workers and survivors on that night. In pairs, use the phrases a-g to match a comment for each situation 1-7 to how they felt when the accident happened.

- you must have been scared to death
- you should have stayed with your group
- you could have drowned
- they should have been helping everyone

- they shouldn't have been watching TV
- he might have been looking at the wrong chart
- he can't have been sleeping

Listening 2

Listen to the radio report on the accident and write a number in the box beside each picture as you hear it on the tape.

Task

Listen to the radio report again and complete the spidergram with the missing information:

Writing

Use the information in Listening 2 and the information from the Greek newspaper below to make a report about what happened. Include what you think might have happened to cause the accident and what the captain and crew should have done or could have done to save the ship.

Με εργασίες απορρύπανσης γιόρτασαν, χθες, στη Θήρα την Ημέρα Περιβάλλοντος. Στις νότιες περιοχές της Καλντέρας εντοπίζεται η ρύπανση. «Αν και συμπληρώνονται δύο μήνες, δεν έχει παρουσιαστεί ακόμα κανένα σχέδιο άντλησης», λέει ο δήμαρχος του νησιού.

Role-play

The sinking of the Titanic was one of the greatest disasters ever. One of the survivors gave an interview to a journalist after the disaster. Look at the situations he describes below and the comments made by the Interviewer. In pairs, take turns and use the information below to make short dialogues and play the roles of the survivor and the interviewer. Look at the example.

Lesson 3

Catastrophes

Task 1

Aesop was the first to stereotype animals. Today, his stereotypes are accepted as representative of various animals' "true" natures. Look at the pictures of the animals. How do we stereotype them?

For example, what would you say for a fox: sneaky/happy?

Complete the similes with the qualities you know about animal behaviour:

happy gentle sick busy strong stubborn wise blind slippery sneaky quiet

as as a mouse as as a bee as as a bat
as as a fox as as an eel as as an owl
as as a lark as as a mule as as a lamb
as as an ox as as a dog

Task 2

We stereotype animals. In what way do we stereotype people?

In small groups, decide on someone you know who has the qualities of the animals. Say why.

In your group, make a list of the ways in which we stereotype people from different countries.

Western Countries

Eastern Europe

Asia

Project

What can we learn from catastrophes?

Your school is participating in an environment protection project and you have to write a report on the causes and consequences of natural disasters in your country. Use newspapers, magazines, the internet or historical data to create a list of three natural disasters that have occurred in Greece in recent years.

1. Make a list of the things that may have caused the disaster.
2. Make a list of the things that people should have done before the disaster.
3. Make a list of the new precautions that are in place to prevent such further disasters.
4. Draw a map of the location for each of the three disasters.
5. Find out the damage that the disaster caused to the environment and loss of life.
6. Find out how much money the disaster cost.
7. Find out how the disaster might have affected different people.

Appendix 1

Unit 1

What a wonderful world!

Task 1

Read texts A and B below and match the missing sentences to the right text.

- i) It was just outside the town and although at times it was a bit too quiet, she felt that there was never any risk and the children were always safe and sound.
- ii) It rained every day, so never again.
- iii) I just want to hang out on a warm sunny beach.

A

A major consideration for me is the weather. Last year I went to New Zealand and I was *sick and tired* of the weather (1)! It was so boring! I work so hard all the year that when I go on holiday, I need to be able to laze around and relax. I do not want to take any tours or see the sights, and I don't want to sunbathe either (2) I intend to have a good time this year so perhaps the Med is my best bet.

B

My sister went to Chania two years ago and said it was the best holiday she ever had. She said she loved the peace and quiet of the small fishing village where she was staying. (3) She especially loved the way all meals were prepared on time in the hotel, and two out of every three meals had fish.

Task 2

In pairs read the description of the two trips. Match a trip to the people in the table below. Which of the three people would probably not like these trips? Why?

A.

Trip One

Week long cruise down the Nile to the Valley of Kings in July. All expenses included in the cost. An overnight journey from Cairo leaves you at the entrance to the valley where you are met by your tour-guide and his camels.

B.

Trip Two

Five days and nights skiing and surf boarding on the snow slopes of Parnassos. Take in the historical sights of Delphi, and experience a trip back in time as you wander round the incredible museum and the local sites.

- 1) My grandfather who is 78.
- 2) George who is a sports teacher.
- 3) My cousin Nancy who is at University studying archaeology.

Appendix 1

Task 3 Read the following four short texts and answer the questions.

The 7 wonders of the ancient world

- A. Although most people know that a list exists of Seven World Wonders, only a few can name them. The first reference to the idea is found in 'History' of Herodotus in the 5th century BC. The number 'seven' appears in many aspects of literature, mythology, geography and religion. We have the seven Dwarfs; the seven continents; the seven Seas.

- How many students in your class can name the wonders of the world?
- Where was the first historian to mention the Seven Wonders from?
- List things that we count in seven. Compare your list with your class.

B. **The Pyramids**

The oldest wonder is the Great Pyramid of Cheops at Giza in Egypt. It is the only surviving wonder. The monument was built by the Egyptian pharaoh Khufu around the year 2560 BC. Although scientists are still arguing about the main reason for the pyramid, we know for certain that it was used as his tomb when he died. Each side measures 229 metres long. It was the tallest building in the world for more than 43 centuries.

- How many wonders can you see in the world today?
- How old is the Great Pyramid?
- Who was buried inside the Great pyramid?

C. **The Hanging Gardens at Babylon**

The gardens were the idea of Nebuchadnezzar almost who lived in Babylon (604-562 BC). Historians say that he built the gardens to please his wife. Access to the terraced-roofs was through a huge stone stairway". The plants and grass in the gardens were permanently green as streams of water were running through the gardens all the time. Alexander's soldiers had stories to tell about the amazing gardens and palm trees on the banks of the river Euphrates about 50 kilometres south of modern day Baghdad.

- Why were the Hanging Gardens built?
- Do you think Alexander's soldiers were amazed or not by the gardens? Why?
- In which country is the Euphrates river?

D. **The Statue of Zeus**

The statue existed near the ancient town of Olympia. The Athenian sculptor Pheidias began working on the statue around 440BC. The statue was 13 metres tall and sat on a 6 metre wide base. The statue was so high that visitors could see it from as far as five kilometres away. The Greek Pausanias wrote "On his head is a wreath of olives. In his right hand he holds a figure made of ivory and gold. His robe and sandals are made of gold, and his throne is decorated with precious stones, ebony and ivory".

- Does the statue exist today?
- Look on the internet to find the name of another monument that Pheidias built.
- What nationality was Pausanias?

Task 4

A POSTCARD

Match the famous places with the photograph of each. What do you know about each place? Discuss what you know with your partner. Check on the internet. Type in the name of each site to access the site.

Choose one of the places and imagine you are visiting it. Write a postcard home to your friends. Tell them what you are doing at the moment. Tell them what life is like there.

Opera House - Sydney

Sugar Loaf Mountain - Brazil
Colosseum - Rome
Parthenon - Athens
Skanderberg Square - Tirana
Dragalevtsi - Sophia
Stonehenge - England

- Write the names of three teen idols or stars that many young people in Greece like.
- How many of these stars are from Greece? How many are from other countries?
- Which advertisements on TV have got famous stars?
- Are there any politicians who are idols? Why? Why not?

Now, in pairs choose one half of the text to read in order to find out who young people in Asia look up to as idols. Tell your partner the main points in your half of the text.

Idols in other parts of the world - Asia

STUDENT A (First half)

The power of popular culture celebrity has yet to reach China, despite it's opening up of free market ideals in the past decade. But soon it will.

We all know that 'idols' have an influence on young people worldwide. Advertisers, market researchers, and marketing professionals are well aware of the spending power of teenagers, and use idols to get kids to spend their money. But idols are not the same in different parts of the world.

In the naming of "top idols" by a sample of Hong Kong and China teenagers aged 13 to 17, said that 9 of the 'top ten idols' were Chinese pop stars. 'God' came in at a position of 9th.

Students in mainland China, voted for foreign businessmen, elderly local politicians, dead revolutionaries and scientists. Former premier Chou En Lai came in first, followed by US IT businessman and richest man in the world Bill Gates, revolutionary Mao Zedong, scientist Albert Einstein. In atheist China, God didn't even get a look in.

STUDENT B (Second half)

The Chinese list of idols contains various kinds of people with a respect for intellectuals and politicians and 'old guys'. Much of this can be explained by the Chinese education system of highly controlled media. In the Western world, idol status goes far beyond artistic talent only, and moves to a curiosity of their personal lives, opinions, and values. As a result pop celebrities become powerful opinion leaders for their fans. This has a value in advertising, especially for short to medium term products.

Perhaps the first 'manufactured' pop idols were the American 1960's pop group 'The Monkees' - a group of limited-to-average out of work struggling talents who were developed as a commodity by rigorous selection, training, media exposure and what we know call brand 'guardianship'. They were not only marketed by advertisers, but created and developed by them. It was a multimedia blitz - several singles and record albums and the TV show were the result. But like many modern day idols they did not last long and soon their status was forgotten.

Task 2

Now tick the right box for each text.

FIRST HALF	TRUE	FALSE
1. European kids have politicians as idols.		
2. Advertisers know that kids have money to spend.		
3. A politician was the most popular idol in China.		

SECOND HALF	TRUE	FALSE
1. Chinese kids have different idols from kids in other countries.		
2. Idols in the Western world are always talented.		
3. The idol of today will not be the idol of tomorrow.		

Task 3

Read the following advice for parents. Do you agree or disagree? Why? Why not? Discuss your ideas with your partner.

Tips for Handling the Teen Idol Craze

1. _____
Let's face it, at some point each one of our teenagers will drive us crazy with their adoration of a teen idol. We did it, our parents before us did it and the cycle will continue through the end of time. Here are some tips to handle the teen idol craze:
2. _____
You have a world of resources on the Net, you can get information on any teen idol with a minimum of fuss. If you don't approve, then let your teenager know in a respectful, but stern, fashion. If the CDs have parental warnings, remember many can come edited. Ask for the options at the store.
3. _____
If you have a teenager that must have every poster in the world up on their walls, ceilings, doors, etc. use wall tack! Tape can rip the drywall and push pins leave holes.
4. _____
Let your teen in on just how far you'll go with the teen idol craze. If you don't want half nude posters on the wall, then you need to let them know before the poster is bought. If they are disturbing everyone else in the house with their music, set up an action plan on keeping down the volume.
5. _____
CD collections, posters and concert tickets cost money. Suggest a new responsibility for your teenager to take over to make a few extra shillings so they can earn it.
6. _____
Yes, they will think that you are so old, but who cares? Share your memories about how you drove your parents crazy with your teen idols and music. This makes a great family dinner conversation.

Unit 3

Thrills and spills!

Task 1 - Design a Roller Coaster

Look at the diagram of a roller coaster. Indicate on the diagram where potential and kinetic energy increase or decrease.

Now check your answers by following the link

<http://www.science.howstuffworks.com/roller-coaster2.htm> or by reading the text below; your partner will read the text on the next page.

Then match the words 1-6 under each text to the correct box on the diagram. Compare your answers with your partner and discuss any differences.

STUDENT A

Did you know that it is easier to get hurt playing sports or riding a bike than on a park ride? Amusement park rides use physics to make you feel as if there is danger, but **as a matter of fact, the rides are very safe.** How do the laws of physics affect amusement park ride design? At its most basic level, a roller coaster is a machine that uses **gravity and energy** to **send** a train **along** a **twisting track.**

The track begins with a **steep ascent**, which **builds up** energy in the car. Since an object in motion **tends to stay** in motion (*Newton's First Law of motion*), the coaster car will **maintain** a **forward velocity** even when it is moving up the track opposite the force of **gravity**. When the coaster ascends one of the smaller hills that follows the first hill, its **kinetic energy** **changes back** into **potential energy**. In this way the course of the track **is** constantly **converting** energy from kinetic to potential and **back again**. As the train moves, it slowly loses energy to **friction** until it comes to the end of the ride.

Write the words below onto the diagram. Where do forces apply? Compare your answers with your partner and discuss any differences.

- | | |
|-------------------|---------------------|
| 1) kinetic energy | 2) potential energy |
| 3) gravity | 4) friction |
| 5) velocity | 6) first hill |

STUDENT B

Did you know that it is easier to get hurt playing sports or riding a bike than on a park ride? Amusement park rides use physics to make you feel as if there is danger, but as a matter of fact, the rides are very safe. How do the laws of physics affect amusement park ride design? At its most basic level, a roller coaster is a machine that uses gravity and energy to send a train along a twisting track.

A roller coaster's energy is constantly changing between potential and kinetic energy. At the top of the first hill, there is maximum potential energy because the train is as high as it gets. As the train starts down the hill, this potential energy is converted into kinetic energy and the train speeds up. At the bottom of the hill, there is a maximum of kinetic energy and little potential energy. The kinetic energy propels the train up the second hill. As the train enters the loop, it has a lot of kinetic energy and not much potential energy. The potential energy level builds up as the train speeds to the top of the loop, but it is soon converted back to kinetic energy as the train leaves the loop. The coaster tracks channel this force as they control the way the cars fall.

Write the words below onto the diagram. Where do forces apply? Compare your answers with your partner and discuss any differences.

|-------------------|---------------------|
| 1) kinetic energy | 2) potential energy |

Task 2 - 'As'

1. In pairs, find the phrases and expressions with the word 'as' in them.

2. Which phrases mean the following?

- a) when
- b) in fact
- c) at the highest point
- d) because
- e) while (at the same time)

Task 3

In pairs, find the words in both texts which mean the following:

- a) not straight
- b) all the time
- c) changed
- d) circle
- e) use

Appendix 1

Task 4 - Project (optional): Design a Roller Coaster

Speaking

A. Look at the drawings below. In pairs, discuss the best drawing for each stage. Use the texts A-E to help you.

1. The height of first hill
1 ☐ 2 ☐ 3 ☐

2. The shape of first hill
1 ☐ 2 ☐ 3 ☐

3. The exit path
1 ☐ 2 ☐ 3 ☐

4. The height of the second hill
1 ☐ 2 ☐ 3 ☐

5. The loop
1 ☐ 2 ☐ 3 ☐

A. The amount of energy the coaster has depends on the potential energy it gets from the height at the beginning.

B. The slope must be safe.

C. The shape of the loop affects the speed and gravity.

D. Remember the relationship between the height of the hill and the energy of the coaster when the car comes out of the loop.

E. The speed is related to the height of the hill. You need time to slow down at the end.

B. Draw your roller coaster.

Writing

Write the process of how you made your roller coaster.

First, we choose _____ because _____.

Then, we decided on _____ as _____.

Thirdly, we selected _____.

Fourthly, _____.

And finally, we _____.

Task 5

Decide with your class whether your roller coaster will be a success or failure? Why? not? Decide as a class which is the best design of all the students' work.

See Amusement Park Physics at:

<http://www.learner.org/exhibits/parkphysics/coaster/section1.html>

Appendix 1

In pairs, read and complete Newton's 'Laws of Motion' using the words in the box

moving states lessons amount motion object test forces

Newton's first of motion states that for every force there is an equal and opposite force. These are called action and reaction forces . The second law of states that objects at rest tend to stay at , and that objects that are moving tend to continue The third law that when an unbalanced force is applied to an the object accelerates. The fourth law states that the amount of effort a student makes in affects his or her success in school.

Task 7 - Which Law is not one of Newton's Laws?

Ask your Physics teacher to explain Newton's laws of Motion in Greek to check that the Laws on page 27 are correct. Report back to your class.

Task 8

Read the text and match the letters on the diagram with potential energy (P) and kinetic energy (K). Then compare your answers with your partner.

When the roller coaster car reaches the top of a hill the car has a lot of energy. This is called potential energy. When the car starts moving down the hill it has kinetic energy which keeps it moving until it reaches the top of the next hill.

Task 9 - Reading

Read about three theme parks and discuss with your partner which one you would like to go to and why.

Pleasureland

Southport's Pleasureland Theme Park has got the biggest and fastest roller coaster ride in the UK. It is called the Traumatizer and has got five loops and rolls and travels at 80 kilometres per hour so don't eat anything before you go on it!

Sea Life

At Sea Life you can walk around the park and see all kinds of fish and sea life. You can hear lectures about the world under the sea and learn some interesting facts about sea creatures. Bring a notebook!

Hello Fun Park

This is a great place for young teenagers to hang out. As well as the rides there are different places where you can eat and drink. Go with your class and the price is cheaper. Frighten your teachers and take them on the vertical drop which falls 40 metres top the ground!

Comprehension

1. Which place would be good for a group of school friends?
2. Where would your little 8 year old sister enjoy most?
3. Which one mentions a frightening ride?

it's your choice

Unit 4

Click on-Line!

Task 1

A. Look at the photograph. What is in the glass case?

B. Look at the table and fill in the ways that people use the mobile phone in Greece.

At home	At school	At a party	At work
Playing games	Sending messages	Speaking to parents	Ringling family members

Now, compare your answers with three of your classmates to see which uses are the most popular. Compare your ideas with your class.

C. Read the ways some people use the mobile phone and tick if this is right or wrong behaviour. Then in the last column tick the ways you sometimes use your mobile phone. Compare your answers with your partner. Which of you uses the phone in a better way?

Speaking on the phone when they are driving		
Calling friends during a film at the cinema		
Talking to others on the phone when in a bus		
Sending messages to friends during lessons		
Ringling parents to tell them where you are		
Using the phone to keep notes for an examination		

D. Read the following extract from the BBC News site on the web and decide if the writer believes that the telephone has made our lives better. Discuss your answer with your partner.

Whether it's mobile phones that play music, or touch screen computers, the speed of change in technology is growing. But do these gadgets really make any difference to our lives?

Yes, I believe electronics influence how we live and can sometimes help to make our lives easier. For example the mobile phone is useful as we can get in touch with friends or family whenever we want. The phone with a camera is useful to take photographs but I don't agree that our lives are any better than they were before.

All of us can easily think of times when the mobile phone can be annoying. Then there is the danger when people speak on the phone when they are driving. It is a fact, that this behaviour causes many accidents. So, does the phone improve our lives? I am not so sure!

Task 3

A. Read the texts below and answer the questions.

- i) Who created lightning in the myth?
- ii) How many eyes did Gracae have?
- iii) How did Midas feel when his daughter turned to gold

Thor was the son of Odin who was the father of the Norse Gods. The word Norse is the beginning of the name of a northern European country. When Thor rode through the heavens on his chariot he made such a loud noise like the sound of thunder. Sometimes he threw his huge hammer and it created lightning. Today we have the words thunder and lightning which happens when two rain clouds crash into each other. We also remember Thor because one of the weekdays is named after him.

King Acrisius of Argos was afraid that his grandson would kill him one day so when she had her son Perseus, he threw his daughter Danae out of his kingdom. After some time, the king of Seriphus found Danae and fell in love with her. Danae's son, Perseus was jealous and so the king had a plan to send him away. He told Perseus to bring back the head of the gorgon, Medusa and he would not want to marry Danae. He asked the one-eyed Gracae to help him kill the gorgon and then he returned home.

Dionysus gave king Midas a wish as a way of thanking him for his help. Midas asked to be able to turn everything he touched into gold. At the start, Midas loved this wish and became very rich but then he realized that he couldn't touch food or drink because they became gold too. One day, by accident he touched his daughter and she turned to gold. He was very sad when this happened.

Task 4

Look quickly at the text on Delphi below. How many sites are there to see in Delphi? Read the text carefully and complete the table with the missing information.

Some of the most important monuments in Delphi are:

The Temple of Apollo. The visible ruins belong to the last temple, dated to the 4th century B.C., which was peripteral, in Doric order. It was erected exactly on the remains of an earlier temple, dated to the 6th century B.C. Inside was the "adyton", the centre of the Delphic oracle and seat of Pythia. The monument was partly restored during 1938-1941.

The Treasury of the Athenians. Small building in Doric order, with two columns in antis, and rich relief decoration. It was built by the Athenians at the end of the 6th century B.C. in order to house their offerings to Apollo. After its restoration, in 1903-1906, it is the best preserved building on the site.

The Altar of the Chians. The large altar of the sanctuary, in front of the temple of Apollo, was paid for and erected by the people of Chios, in the 5th century B.C., according to an inscription cut on the cornice. The monument was made of black marble, except for the base and cornice which were of white marble, resulting in an impressive colour contrast. The altar was restored in 1920.

The Stoa of the Athenians. The stoa, built in the Ionic order, has seven fluted columns, each made from a single stone. According to an inscription cut on the stylobate, it was erected by the Athenians, after 478 B.C., to house the trophies taken in their naval victories over the Persians. Excavation began in 1893.

The Theatre of the Sanctuary. It was originally built in the 4th century B.C. but the ruins we see today date from the Roman Imperial period and was built by the Romans. The cavea had 35 rows of stone benches; the foundations of the skene are preserved on the paved orchestra. The theatre was used mostly for the theatrical performances during the great festivals of the sanctuary.

The Stadium was constructed in the 5th century B.C. and was remodelled in the 2nd century A.D. at the expense of Herodes Atticus. Then were added the stone seats and the arched monumental entrance. It was in this Stadium that the panhellenic Pythian Games took place.

The Tholos. Circular building in Doric order, built in ca. 380 B.C. Its function remains unknown but It must have been an important building, judging from the multi-coloured stone, the fine workmanship and the high-standard relief decoration. The monument was partly reconstructed in 1938.

The Gymnasium was a complex of buildings used by the youths of Delphi for their education and practice. It was constructed in two levels: on the upper was a stoa and a free open space used for running practice, and on the lower was the palaestra, the pool and the baths (thermae).

Unit 6

Keeping traditions and customs alive.

Task 1 - Reading

Read one of the two texts below and then use the questions to report to your partner what each text is about.

Halloween

Halloween is an annual celebration that takes place each year on the 31st of October. The word hallow is an old English word which means Saint. The ending *een* comes from the old word *eve* or *evening*. On the night of 31st October children dress up as ghosts or spirits and go around their area. They knock on the doors of their neighbours' houses and shout 'trick or treat'. The people in the houses usually give the children a treat which is some sweets or candy. People put a candle inside a pumpkin to frighten away the dead spirits.

A. Use the questions below to ask your partner about the text he or she has read:

- i) What does Halloween mean?
- ii) When is Halloween?
- iii) What did people dress up as on Halloween?
- iv) Why did people light bonfires?
- v) What does 'trick or treat' mean?

B. What does the decoration of a key mean on the spoons in Wales?

St. Valentine's Day

One of the most popular customs in England is on 14th February. One story of the origins of Valentine's Day comes from the time of the Roman Empire, under the rule of Emperor Claudius the Second. Because few soldiers wanted to fight in the Roman wars, Claudius had a difficult time to get soldiers to join his army. He believed that Roman men did not want to leave their loves or families. During this time a Christian priest named Valentine decided to defend love in the empire. Valentine began to secretly marry couples despite the emperor's orders. When Emperor Claudius heard about this he sent Valentine to prison where he stayed until his death on February 14 in the year 270. In Wales, young men and women carve wooden spoons and give them as gifts. Hearts, keys and keyholes are favourite decorations on the spoons, meaning "You unlock my heart." Flowers are the most common gift, a dozen red roses or (more romantically and cheaper) just one red rose.

Valentine's Day celebrations in Japan are a different affair. Here ladies buy chocolate for men. Then one month later it is the turn of the men to give in return. It is March 14th (the White Day), when men give gifts of chocolate to all the ladies who remembered them on Valentine's Day.

A. Use the questions below to ask your partner about the text he or she has read:

- i) Who was St. Valentine?
- ii) When is St. Valentine's Day?
- iii) Why did the Emperor Claudius put Valentine in prison?
- iv) What do Japanese men do on March 14th?
- v) What might your father give your mother on Valentine's Day?

Olive Oil

Olive oil is obtained from the olive tree. It is used in cooking, cosmetics, pharmaceuticals, and soaps and as a fuel for traditional oil lamps. To make olive oil, you grind olives. First the olives are ground into an olive paste using large millstones. Then the olive paste is spread on disks. These disks are stacked on top of each other, and then placed into the press. Then, pressure is applied onto the disk to separate the oil from the paste. Water is run down the sides of the disks.

Olive oil has a high content of **monounsaturated** fat. Doctors say that monounsaturated fats in the diet is linked with a lower risk of heart disease.

Reading

Task 1

In an international project, schoolchildren were asked to send in letters and pictures that describe how energy sources are used in their community and the impact on the environment and their lives.

A. Look at the three texts and find the names of the capital cities in each.

Then write down the name of each country. Ask your classmates to help you or look in your Geography book.

B. In groups of three, choose one of the texts A, B or C and skim quickly through it to find the energy sources mentioned. Then report back to your group.

Beijing bicycles

Hello! My name is Jiang An Li. I live with my mum and dad in Beijing. My mum says that everyone should go on bicycles because then the air would be cleaner. When I asked her how this could happen, she said that the government should ban all cars. When I don't have school or things to do around the house, I go for a ride on our bikes with my sister and friends. Our electricity comes from a power station outside Beijing that burns coal. My cousin Zhi Xian lives in Shanghai. Her house also has electricity, but it comes from hydro-power which comes from the water falling over the big Three Gorges dam, which has been built across the Yangtze River.

A

Task 2a

Draw a line to match each photograph with the corresponding part of the text.

Boiled alive!

Hello! My name is Brynja. I live in Reykjavik. In winter we have only four hours of daylight. When my cousin from Spain visited us last year he said it felt strange to have the lights on during the day. He told me that in Spain people used solar power to heat their houses and for showers. There is hot underground water in Iceland because of the volcanoes that are in our country. Even in winter, it's still really hot, so we can go swimming in it. We all love to spend our free time in this way. My mum asked me if I wanted to go swimming this afternoon at an outdoor pool. Of course, I agreed.

B

Task 2b

Draw a line from the photographs to the corresponding parts of the text.

Appendix 1

An Indian summer

Hello, my name is Lalita. I live in Delhi. We use a horse and cart to travel around. I have never been to Delhi but my mum told me that it was a huge city. Mum cooks in the small room using a wood fire. We don't have enough wood to heat water to wash in, so I wash under the pump in the yard. Dad has told us that one day he would build us a new house. After school I collect firewood or help mum with dinner. When it gets dark we light our kerosene lamp, which lights our room with a bright flame. Mum sings and dad tells stories, when I told her they weren't as good as mine, she laughed.

Task 2c

Draw a line from the photographs to the corresponding parts of the text.

Task 3

Find the countries where the speakers live on the map in the Appendix. What else do you know about these countries (e.g. famous sites and landmarks, lifestyle, food, means of transport)? Do you know any other countries using the same energy sources and with the same lifestyle? Would you rather live in one of these countries or in your own? Why? Which of these countries would you like to visit? Why? Discuss as a class.

Task 4

Look at the following pictures and decide with your partner which three are the most important. Say why. Then, write a number beside each one in order of importance in our lives. Compare your answers with your partner.

Unit 10

Natural phenomena.

Reading 1

Task 1

What do you know about the lost world of Atlantis? Which of the visuals might be Atlantis? Why? Read the short text below to check your answers.

Atlantis

Plato described Atlantis as a place that must have been very beautiful. There were palaces, harbours, temples and docks. There were beautiful and buildings, fountains that had both hot and cold water. The capital city was built on a hill and surrounded by rings of water, which were joined by tunnels. These were large enough for a ship to sail through. A huge canal connected the outer rings of water to the ocean. Outside the city there were huge fields where farmers grew the city's food.

Adapted from:

<http://www.kidzworld.com/article/960-history-the-lost-city-of-atlantis>

Task 2

Read the short text and then write two statements about what you think life must have been like on Atlantis:

in a building

in a harbour

in tunnels

in the fields

Appendix 1

Task 3

Write answers to the following questions:

i) What do you think could have caused Atlantis to disappear?

ii) What do you think might have happened to Atlantis?

Reading 2

Read the title of the text and look at the picture of Pompeii. What might 'THE UNWELCOME NEIGHBOUR' refer to?

'An Unwelcome Neighbour'

Around noon on 24th August AD 79 Vesuvius awoke. During the previous months there were usual signs of an eruption and so the locals must have known that something terrible was going to happen. The first eruption must have happened around 1 o'clock as the marketplace was full of dead bodies. The people can't have made any preparations to protect the mselves from the flowing lava and burning ash. The local authorities should have had plans ready for the evacuation of the town but they didn't pay attention to the danger. What is certain is that it all must have happened so quickly that 2,000 people couldn't have predicted that day would turn into night in a matter of seconds.

Adapted from

http://www.windows.ucar.edu/tour/link=/earth/interior/Mt_Vesuvius_ad79.html&edu=high

Task 1

- Why do you think it is possible to mean 'Vesuvius awoke'?
- Circle a verb phrase which shows a strong possibility.
- Find a verb phrase which shows that something is almost certain.
- Find a verb phrase which shows that something most likely didn't happen.
- What signs do you imagine the people may have seen before the eruption?

Task 1

Read the three texts on natural disasters below and complete the table with signs of disaster.

DISASTER	earthquake	hurricane	tsunami
SIGNS			

Warning signs are often there! Learn to recognise them and be prepared.

A. Hurricanes

When the skies turn dark and begin to change colours to yellow or green, it is time to find somewhere to run. The rise in ocean temperatures causes strong winds to blow, as happened with hurricane Katrina in August 2007. As pressure falls and temperatures rise a stillness settles over the sea. These are all signs that a hurricane is coming.

B. Tsunamis

Tsunamis are perhaps the most difficult to prepare for. An earthquake near water may be sign that a tsunami will shortly follow. In an area where the sea suddenly draws back many survivors say they heard a sucking sound. The Indian Ocean tsunami of 26th December 2004, was one of the worst disasters in history.

C. Earthquakes

Before an earthquake the temperature of the earth rises between 5 and 9 degrees Celsius. This causes negative effects on the radio, television and telephone. Before an earthquake, mobile telephones stop working. Some hours before an earthquake, animals become restless. Animals like cows, dogs, cats struggle against being tied up, and even attack the owner.
