

ΘΕΜΑ 1. ΚΑΤΑΝΟΗΣΗ ΓΡΑΠΤΟΥ ΛΟΓΟΥ

Read the text and decide if each statement (1-10) is True (A) or False (B).

Our body needs food in order to develop and live. Eating the right food can help our body grow naturally and normally. This is why we should try to make sure that our diet is as full of nutrients as possible. More and more people are beginning to discover that certain kinds of food can be good for our body and can help it maintain its good condition and fight illnesses, while other kinds of food are not good for it. Such food is called 'junk food', which is high in fat and has a lot of sugar and salt.

All of us know that our nutritional needs vary a lot depending on our age, general life style and the demands the way we live places on our body. As a result, not everything suits everybody. Instead, we need to be aware of the products that are best for us and do good to our health. Scientists and doctors say that beauty may result from a healthy diet, a lifestyle with no stress and regular exercise, which may also create a beauty within our body. The way our body looks reflects the state of our health and our emotional life.

The good news is that we do not lack the information that tells us which food can cover our needs and be good for our health.

(Words: 225)

STATEMENTS		A	B
		TRUE	FALSE
