

# Endangered Species

What can we do to protect them?

WE NEED TO TAKE  
ACTION IN ORDER  
TO PROTECT  
ENDANGERED  
SPECIES!

# REDUCE POLLUTION

It is shown that a lot of animals die because they accidentally eat the garbage that humans have thrown in the environment. So reduce water, air and environmental pollution by using environmentally friendly products.

## PRESERVE THEIR NATURAL HABITATS

Plenty of animals have extinct due to the destruction of their natural habitat. So we need to take care of their environment by neither polluting nor burning it.

# STOP USING PRODUCTS THAT COME FROM ENDANGERED ANIMALS

A great amount of animals are now in danger because their species have been used for creating products such as pieces of clothing.

It is our duty to help all these poor animals . What can we do ? We can volunteer in recycling programs, protest for animal's rights and preserve wildlife habitats.
