

Tilemaxos Nasoulas

A2 (2023-24)

MY PRESENTATION ABOUT:

“What is the point in saving endangered species?”

Saving endangered species is important for several reasons:

- Biodiversity:

it can disrupt the delicate balance of its ecosystem

- Ecosystem Services:

Many endangered species provide essential ecosystem services

- Scientific and Medical Discoveries:

Losing species means losing potential sources of innovation and discovery

- Aesthetic and Cultural Value:

Endangered species often have cultural significance for indigenous communities and societies around the world

- Ethical Considerations:

From an ethical perspective, it is considered morally wrong

- Ecotourism and Recreation:

Endangered species can serve as attractions for ecotourism

Overall:

Saving endangered species is crucial for maintaining the health and functioning of ecosystems, preserving valuable ecosystem services, fostering scientific and medical advancements, respecting cultural diversity, upholding ethical principles, and supporting sustainable economic development.
