Dear Greta Thunberg,

As a citizen sensitized on environmental issues, I would like to express my wholehearted support for you and your cause. I am firmly convinced that your brave and insisting struggle against climate change and its disastrous effects on our planet, are of invaluable importance.

First and foremost, I am of the opinion that your efforts have been an inspiration not only to environmentalists on a worldwide scale, but also to the younger generations that are willing to contribute to the protection of our planet. I have to admit that I am really impressed by your courage and perseverance despite your young age. Everyone should raise awareness and fight against such a meaningful purpose.

Personally, being encouraged by your deeds, I have decided to adopt a more environmentally friendly lifestyle and attitude by following some simple but essential steps. For instance, I have tried to dispose of plastic materials on a daily basis, and replace them with reusable ones such as glass and fabric. Furthermore, I commute to work by exclusively using public transportation or my bicycle. In this way, I have achieved to go green and in turn support nature sustainability.

All things considered, it is clear that there is much that can be done to tackle the tremendous impact of climate crisis on Earth. But most importantly, inspiration is the key that will lead to more eco-friendly and respectful world when it comes, to environmental issues. Thank you for teaching us how to work towards this direction.

Sincerely,
Alex
