Team work for best results

1 Assign roles:

1. Project Manager: You keep the team organized and check the flow. You are the boss of the workflow!
2. Technical Editor: You handle the padlet and the digital tools. You are the Master of Technology!
3. Speaker(s): You will present the final project to the class. You are the voice of the team!

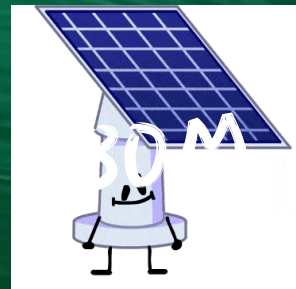

BASIC SCRIPT to make a presentation: GREEN ENERGY - PROS vs CONS

- Today, we present our project about
- A great advantage is that it is
- For example
- However a disadvantage is that
- In our opinion this technology is the future for electricians

Go to webpage and check sections : Summary & solar panels how they work

OR Use the PROS vs CONS table

Some ideas for your presentation!

TOPIC	<u>PROS(+)</u>	<u>CONS(-)</u>
RENEWABLE ENERGY	<ul style="list-style-type: none">• Inexhaustible: the sun and wind never end• Eco-friendly: No CO2	<ul style="list-style-type: none">• Unreliable: No sun at night• No wind sometimes• Space: Needs a lot of land

Show enthusiasm, flash a smile and maintain eye contact with your audience.

1. We useto collect.....

2. turn wind into electricity

3. This energy is good for the

Technical note:
Solar panels producepower. We use anto change it to ...at home or school.

DC, AC, INVERTER,
WIND TURBINES,
SOLAR PANELS,
SUNLIGHT,
ENVIRONMENT
