Η εφαρμογή Notepad++

The image shows a screenshot of the Notepad++ website and a code editor window. The website is for notepad-plus-plus.org and features a green cartoon frog logo. The left sidebar contains navigation links: home, download, news, features, resources, contribute, donate, contributors, and links. The main content area is divided into 'News' and 'About' sections. The 'News' section lists several releases from 2013, including versions 6.5.4, 6.5.3, 6.5.2, 6.5.1, 6.5, and 6.4.4, as well as a regression fix. The 'About' section describes Notepad++ as a free source code editor and replacement for Notepad, supporting multiple languages and governed by the GPL license. It also mentions its basis on the Scintilla component and its goal to reduce carbon dioxide emissions by being efficient. An inset window shows a code editor with C++ code for a program named notepad4ever.cpp.

About

Notepad++ is a free (as in "free speech" and also as in "free beer") source code editor and Notepad replacement that supports several languages. Running in the MS Windows environment, its use is governed by [GPL](#) License.

Based on the powerful editing component [Scintilla](#), **Notepad++** is written in C++ and uses pure Win32 API and STL which ensures a higher execution speed and smaller program size. By optimizing as many routines as possible without losing user friendliness, **Notepad++** is trying to reduce the world carbon dioxide emissions. When using less CPU power, the PC can throttle down and reduce power consumption, resulting in a greener environment.

```
*D:\source\notepad4ever.cpp - Notepad++
#include <GPL.h>
#include <free_software.h>

void notepad4ever ()
{
    while (true)
```
